  II. If Registration is not successful, it'll show corresponding error message.

  III. if Registration is successful, based on the **<u>orientation</u>** which will open another page and show the message "**<u>Please Wait ...…   LFD will Restart automatically within 10 seconds then it will play in Landscape/Portrait mode</u>**". Then TV will restart automatically within 10 seconds and play in selected orientation mode (Landscape or portrait).

Key things to remember while playing a layout on SSSP supported display:

1. For first Time, the Firmware should be updated with latest versions. Otherwise it will not be going to download any file from server.

2. Enable SSSP_PLATFORM in setting page of Server.

3. You have to Unpublish and publish the layout before scheduling that, because may be layout file has changed due to server updation.

4. You have to provide QMS URL, if and only if some QMS media added in layout.

5. You have not added any .zip media like, template in layout (It's not supported).

6. The layout background is transparent, if you are going to play a video or flash or office document.

7. As of now SSSP does not support simultaneous playback of Office Doc./pdf, Video, Input Source and Streaming. You can put it one after other in one region. You can play two videos simultaneously. If content is high performance oriented, then it is recommended to play video in only one region.

8. In 'C' series model:

    i. Capture functionality wont supported.

    ii. Documents won't play.

    iii. Monitor on and off functionality wont supported.

    iv. TV Control commands won't work.

    v. We can't get the details of TV (TV model, Firmware Version).

9. For Portrait mode,

----- Portrait mode won't support in 'C' Series model.

----- Playback of two videos, two Streamings simultaneously are not
      supported,

----- Does not support Input Source (in D series model),

----- Two input sources are not supported (in E series model),

---- Office docs/pdfs not supported, but can play individually.
